STATE OF MICHIGAN

DEPATEMENT OF VATURAL RESOURCES.

WATER RESOURCES COMMISSION

18 . TO WELLER OF APPRENSIT OF WWW. CONCURRENCE Permualt Corp. No. 41 to, Michigan

RPDCS PERMIT RO. MI 0002381 FINAL ORDER NO. 1994

17 15 Con a GF 25/Navrare

staff of the Water Resources Cornission on February 19, 1981

staff of the Water Quality Division, and based upon the official files of the Water Resources Commission:

- IT 10 7.13 % ALIOS FINDING OF FACT of the Water Resources, Commission and Commission Department of Natural Resources, that Femandit Goryanting was issued National Publicant Discharge Elimination System (DPDIC) Pareit No. MI 0002381 on June 20, 1975, for its Apail her finiting in Wandotte, Michigan. Said Permit was revised Burch 3, 1976, and again May 21, 1976.
- IT 10 1.10 5 744 EMPRIOS FIRMING OF Pact of the Uniter Percences Commissional did to the bland Department of Daton 1 Resources, the Federal Glean Water Act of 1977 (2.1. 95-217), which amended the Federal Water tellustic Control Act recondents of 1972 (P.1. 92-500), and the Michigan Rater Resources Cormission Act (Act 245, P.A. 1979 as approached), require that by no later than July 1, 1977, all discharges to the perfects waters of the State of Michigan have wante treatment facilities installed and operating, which conform with Best Practicable Control Section 1977 Commission Act (B.P.C.T.C.A.) as defined by the United States Law remembed Protection Agency (U.S. EPA) and regions steingrat limitations necessary to meet the water quality standards of the State of Michigan.

1. CONTROL OF THE EMPRISS FIRMING OF FACT of the Water Resources Commission and the Michig of Prantment of Natural Resources, that MPDES Mermit but MI 600-733 contained final cities the initiations and a schedule of compliance to achieve those limitations by July 1, 1977.

FIT 16 Notice. The Perriss Flabrid of PACT of the Mater Resources Commission in the fill-line Department of Natural Resources, that although Foundal the perrison couplind with fortions of the schedule of complete company violated the terms and conditions of NPDES department of CO2361 by its continued inability to achieve effluent limitations specified within the permit.

- IT IS FURTHER RIE EXPRESS FIRBING OF FACE of the water Resources Combission and Hichigan Department of Natural Resources, that as a right of these contincing violations, a Final Order of Abate cant, Deck Order Ko. 1931 was entered in Ortober 1977. Under provisions of the Final Order, Pennwalt Corporation immediately paid as liquidited damages the sum of one hundred fifty thousand dollars (\$150.000.000) to the general found of the State of Michigan. Additionally, the Final Order modified the schedule of compliance contained in 5 000 Permit No. NI 0002381, allowing an extension of time for achieving compliance to October 1, 1977, for Outfall 002, to April 1, 1973, for Outfalls 003 and 005, and to February 1, 1978, for Outfall 006.
- IT IS FURTHER THE EXPR. IS PINDING OF FACT of the Water Resources of Sesion and the Michigan Department of Natural Resources, that Toursell Corporation failed to attain the operational level necessary to meet the offluent limitations specified in Final Order No. 1921 in accordance with the schedule outlined therein.
- IT IS FURTHER THE EXPRESS ELIDING OF FACT of the Water Resources Conclusion and the Michigan Department of Natural Resources, that unler provisions of Final Order 1931, specific to violations of final officers of deathers after required compliance dates. Pennwa't Corporation county, transcript made payments of liquidated damages totaling an additional county hundred eighty thousand dollars (\$180,000.00). Subsequent violations of the final efilment limitations were violations of the limit Order for which the State could seek other and further relact.
- IT IS THE EMPRESS FINDING OF FACT of the Water Resources Commission and the Michigan Department of Natural Resources, that in Locar Paper with Part 5 Rules of the General Rules of the Water Resource: On dission that Penmualt Corporation is required to submit and implement a Pollution Incident Prevention Plan.
- IT IS FURTHER THE EXPRESS FIRDING OF PACT of the Water Resources C dission and the Michigan Department of Natural Resources, that Penevalt Corporation submitted a revised Pollution Incident Prevention Flom (PIPP) November 16, 1979 and that said plan included a proposal implementation schedule for construction of additional contribution facilities for both the East and West Plants.
- IT IS FURTHER THE EXPRESS FINDING OF FACT of the Water Resources Condition and the Michigan Department of Natural Resources, that the publications contained in the United States Environmental Protection Assert (EPA) promulgated guidelines for the Inerganic Chemical indexing subcategory, dated March 12, 1974 and May 22, 1975, are not applicable to the Pennwalt facilities.
- IT IS FURTHER THE EXPRESS FIRDING OF FACT of the Water Resources Co. Ission and the Michigan Department of Natural Resources, that the Company continuously measures pH at all its process wastewater discharges.

- 17 IS COURTED TO EXPOSES FINDING OF FACT of the Mater Resources Commission and the Michigan Department of Matural Resources, that the EPA decrease entitled formation process of FOR Moderatory OF PM SEPTLUENT LIMITED CONSIDERATION OF SEVEN DELICATION OF PM SEPTLUENT LIMITED CONSIDERATION OF ANY DELICATION OF PM SEPTLUENT LIMITED CONSIDERATION OF ANY DESCRIPTION OF PM SEPTLUENT PM published November 1-7 states in standards (6.0-9.0) whenever final effluent pM is required to be measured continuously may be beyond the capabilities of LeT and BUT systems."
- IT IS FIREHOLD THE EXPRESS FINDING OF FACT of the Water Resources Commission and the Department of Natural Resources, that, as evidenced by the Company's December 18, 1979, demonstration of their existing pil control facilities, the pil limitations contained in this Final Order are appropriate.
- in 1902 THE EXPRESS FINDING OF FACT of the Water Resources Commission of the Michigan Department of Natural Resources, that compliance with the pit limitations contained in this Final Order will insure full protection of the State's water quality standards and will protect the State's waters against pollution, impairment, or destruction.
- IT IS ACCOUNTS BY ALL PARTIES, the Department of Matural Resources, the Nates Associates Commission, and Penavalt Corporation, that in the absociated effective guidelines for pil, it is the judgment of the portion that the prescript facilities installed by the Company constitute I at Practicable Control Technology Currently Available (E.B.C.,C.A.). The parties also recognize that the United States Environ stall Protection Agreey (EPA) has neither made a final descriptation on this issue nor authorized the inclusion of the pil is intices contained herein in a revised RPDES permit for Pennwalt, and that a final determination by LPA on this issue may require modification of this Final Order or the RDPUS permit. In this exact, either party may seek such modification.
- IT IS FULLFALE THE EXPRESS FLUDING OF FACT of the Water Resour es Commission a 1 th. Michigan Department of Mutural Resources, that the Company has reviewed this Consent Order and while neither admitting nor denying that litigation of the issues would have resulted in a finding of the violations referred to in this Order or award of the duriges set forth in this Order, has agreed to its entry as Final Order of the Water Resources Commission.
- 17 IS THE WARE ORDERED that Final Order of Abatement No. 1931 entered on Outster 14, 1977 is hereby rescinded.
- IT to 1 mile OfficeD that Nibbs Permit No. MI 0002381 issued on June 20, 1575, as stiscepently revised, is in full force and effect except that compliance with Section A of this Final Order constitutes congliance with Part I, Section A of the NIDBS permit until NPDES Permit No. MI 0002381 is reissued, suspended, rescinded or revoked.

SECTION A EFFLUENT CONDUTIONS AND MONITORING REQUIREMENTS

IT IS FURTHER ORDERED that Pennwalt Corporation shall comply with the following testrictions and conditions:

1. Final Effluent Limitations

During the period beginning on the effective date of this Final Order and lasting until the expiration of authorization under this Final Order, the permittee is authorized to discharge up to a maximum of eight million one hundred thousand (c.10,000) gallons per day of noncontact cooling water from Outfull 111. Such discharge shall be limited and monitored by the per litee as specified below:

kg/day (lbs/day) Other Limitations Monitorial and in	ements
Effluent Monthly Daily Monthly Daily Measure of Science	y i e
Characteristics Average Maximum Average Maximum From y Type Flow, M / Day (MGD) 3x Weenly	: =_
Flow, M /Day (MGD) 3x thenly	
•	
Total Suspended Solids Weekly Grait	b
•	
Total Residual Chlorine Weekly Grat	b
Ammonia (as N) Weekly Graf	b
Chlorides Weckly Grain	1.
Oil & Grease No Visible Film Daily Vis-	
Cost	ervation
Temperature Weekly here	ding
000	
COD Weekly Cra	5

The term noncontact cooling water shall mean water used for cooling, which does not come into direct contact with any naw material, into-madiate product, by product, waste product, or finished product.

- a. The pil shall not be less than 6.0 nor greater than 9.0. The pil shall be monitored as follows: weekly; grab.
- b. The discharge shall not cause excessive from in the receiving waters. The discharge shall be essentially free of floating and settleable solids.
- c. The discharge shall not contain oil or other substances is amounts sufficient to create a visible film or sheen on the receiving waters.
- d. Samples taken in compliance with the monitoring require: ats above shall be taken at Outfall 001 prior to discharge to Mye Street storm sewer.
- In the event the permittee shall require the use of Water Treatment additives the permittee shall notify the Michigan Water Resources Commission in accordance with the requirements of Part II, Section A-1 of NPDES Permit No. MI 0002381.

2. Final Effluent Limitations

During the period beginning on the effective date of this Finil Order and lasting until the expiration of authorization under this Final Order, the permittee is authorized to discharge up to a maximum of seventeen mallion nine handred thousand (17,969,000) gallons per day of contact cooling water, process water, and noncontact cooling water from Outfall 002. Such discharge shall be limited and monitored by the permittee as specified below:

	<u>Discharge</u>				
	Monthly Daily	Other Limi Monthly		Measurement	
Flor, 11 /Day ()	Arcrage Maximum (GD)	Average	Maximum	3x Weekly	Туре
Chlorides				3x Weekly	24 Mr. Comp.
Granse	•	No Visible	e Film	Daily	Visual Observation
Temperature				Daily	Reading
C()	•		_	3x Weekly	24 Hr. Comp.
Total Sugande					
Solid:	4103(9046) 8206(180	92)		5x Weekly	Crab
Amonia (as N)		1.4 mg/l	2.3 mg/l	3x Wrekly	24 Hr. Comp.
Total Residual	Chlorine	1.0 mg/1	1.5 mg/l	Daily	Grab
Total Lend	0.6(1.37) 1.75(2.75			Twice Monthly	24 Hr. Comp.

The term noncontact cooling water shall mean water used for cooling which does not cone into direct contact with any raw material, intermediate product, by-product, waste product, or finished product.

a. The pH shall be within the range of 6.0 to 9.5, 90% of the time; within the range of 5.0 to 10.0, 95% of the time; within the range of 3.0 to 11.0, 99% of the time; within the range of 2.0 to 12.0, 100% of the time during a 24 hour period beginning on conduct 7:90 a.m. of each day. The pH shall be monitored as follows: continuous; report the maximum and minimum and percent of time within each range during the above 24 hour period.

- b. The discharge shall not cause excessive foam in the receiving waters. The discharge shall be essentially free of floating and settleable solids.
- c. The discharge shall not contain oil or other substances in accents sufficient to create a visible film or sheen on the receiving waters.
- d. Samples taken in compliance with the monitoring requirements above shall be taken at Outfall 602 prior to discharge to the Detroit River.
- e. In the event the permittee shall require the use of Water Treatment Additives, the permittee shall notify the Michigan Water Resources Commission in accordance with the requirements of Part II, Section A-1 of NPDES Permit No. MI 0002381.

. Final Elligent Limitations

During the period beginning on the effective date of thi Final Order and lasting until the expiration of authorization under this Final Order, the permittee is authorized to discharge up to a maximum of nine million eight hundred theuseni (2,625,600) gallons per day of contact cooling water, process water, including waste water from the cell room, and noncontact cooling water from Outfall 003. Such discharge shall be limited and menitored by the permittee as specified below:

	kg/day (lbs/day)	Discharge Other Lin	Limitatio	ns Romitorico Lo	cuircente
Effluent Characteristics	Monthly Daily Average Maximum	Monthly Average	Daily Maximum	Meanurement	
Flow, M ³ /Day (MG	D)			3x Weekly	•

Total Lead	0.45(1.0) 0.9(2.0)			Twice Mont'tly	24 Hr. Comp.
Total Residual C	Chlorine	1.0 mg/1	1.5 mg/l	Paily	Grab

The term noncontact cooling water means water used for cooling which does not come into direct contact with any raw material, intermediate product, by-product, waste product, or finished product.

- a. The pH shall be within the range of 6.0 to 9.5, 907 of the time; within the range of 6.0 to 11.0, 997 of the time; and within the range of 2.0 to 11.0, 100% of the time during a 24 hour period beganning on or about 7:00 a.m. of each day. The pH shall be monitored as follows: continuous; report the maximum and minimum and percent of time within each range during the above 24 hour period.
- b. The discharge shall not cause excessive from in the receiving waters. The discharge shall be essentially free of floating and settleable solids.
- c. The discharge shall not contain oil or other substances in amounts sufficient to create a visible film or sheen on the receiving waters.
- d. Samples taken in compliance with the monitoring requirements above shall be taken at Outfall 003 prior to discharge to the Detroit River.
- e. In the event the permittee shall require the use of Water Treatment additives, the permittee shall notify the Michigan Water Resources Commission in accordance with the requirements of Part II, Section A-1 of NPDES Permit No. HI 0002381.

4. Final Effluent Limitations

Derive the period beginning on the effective date of this Final Greer and lasting until the expiration of authorization under this Final Order, the permittee is authorized to discharge up to a maximum of two million three hundred thousand (2,300,000) galloss per days of process water, including ferric chloride process water from Outfull 005. Such discharge shall be limited and monitored by the permittee as specified below:

			Limitatio	ns		
		bs/day)×#		itations	Monitoring Red	quirements
Effluent	Monthly	Daily	Monthly	Daily	Measurement	Sample
Characteristics	Average	Maximum	Average	Maximum	Frequency	Type
Flow, H ³ /Day (MG	D)				Continuous	
To Solids*	212(467)	425(934)	35 mz/l	70 mg/l	5x Weekly	Grab
	222(101)	42)()34)	JJ -6 / L	, , , , , ,	JA WELKIY	GIAD
COD		821(1801)			3x Weekly	24 Hr. Comp.

Total Residual Chlorine			1.0 mg/l	1.5 mg/l	Daily	Grab
Chlorides					3x Weckly	24 Hr. Comp.
Total Lead	0.6(1.4)	1.2(2.7)	0.1 mg/l	0.2 wg/l	Twice Monthly	24 Hr. Comp.
Oil & Grease			No Visibl	e Film	Daily	Visual Obs ervation
Tamperature					Daily	Reading

- * The above limitations for Total Suspended Solids may be modified to net value upon demonstration to the Chief of the Water Quality Division of the Michigan Department of Natural Resources that gross values are unattainable due to technical or economic considerations. Such modification shapping made in accordance with Part II, Section B-4 of NPDES Permit No. 1002381.
- ** kz/day (los/day) values are not related to flow volume.
 - a. The ;H shall be within the range of 6.0 to 9.5, 90% of the time; within the range of 5.0 to 10.0, 95% of the time; within the range of 3.0 to 11.0, 100% of the time during a 24 hour regred beginning on or about 7:00 a.m. of each day. The pH shall be conitored as follows: continuous report the maximum and minimum and percent of time within each range during the above 14 hour period.
 - b. The discharge shall not cause excessive foam in the receiving waters. The discharge shall be essentially free of floating and settleable solids.
 - c. The discharge shall not contain oil or other substances in amounts sufficient to create a visible film or sheen on the receiving waters.
 - d. Samples taken in compliance with the monitoring requirements
 above shall be taken at Outfall 605 prior to mixing with effluent
 from the Myandotte-Wayne waste water treatment plant.

5 Winel Wffluort Limitations - Total Chloride Loading

During the period beginning on the effective date of this Final Older and lasting until the expiration of authoritien under this Final Older, the permittee is authorized to discharge contact cooling water, becometric condenser water, neacoutist cooling water and process water from Outfalls 001, 602, 603, and 005. Such discharges shall be limited and monitored by the permittee as specified below:

Effluent kg/day (lus/day) Characteristic Daily Maximum		Mrs undirent Transpey	Sample Type
Total Combined Outfa	ills 001, 002, 003 and 005:		
Chlorides*	227,000(500,000)	3x Whakly	Calculat

Moni oring Punniverents

1.0 mg/l Twice Monthly 24 Hr. Comp.

Discharge Limitations

6. Final Effluent Limitations

Total Zinc

During the period beginning on the effective date of this Final Order and lasting until the expiration of authorize lon under this Final Order, the permittee is authorized to Clorkarge up to a maximum of transition (10,000,000) gallous per 2 pc of noncontact cooling water, barometric condenser water of 2 process water from Outfall 006. Such discharge shall be limited and monitored by the permittee as specified below:

		Discharge				
	kg/day(1b			nitations	Monitoria 1	
Effluent	Monthly	Daily	Montaly	•	Measure	•
Characteristic	Average	Maximum	Average	Maximum	Frequency	Tire
Flow, M ³ /Day (MG	(ס			•	3x Weekly

COD			•		3x Weakly	24 Hr. Comp.
Total Suspended Solida	173(380) (net)	259(570) (net)			3x Weekly	24 Hr. Comp.
Chlorides		4000(6300 (net)			3x Weekly	24 Hr. Comp.
Ammonia (unionia	red)			0.2 mg/l	3x Weekly	Crab
Total Residual (Chlorine			0.5 mg/l	3x Weekly	Grab
Pheno1		4.5(10)		0.2 mg/1	3x Weekly	24 Hr. Comp.
Sulfide					Weekly	24 Hr. Comp.
Temperature					3x Weekly	Feading
Oil & Grense			No Visib	le Film	paily	Visual Observation

kg/day (lbs/day) values are not related to the flow volume.

^{*} The above limitations for chlorides may be modified to a net value upon demonstration to the Chief of the Water Quality Division that grows values are unattainable due to technical or economic considerations. Such modification shall be made in accordance with Part II, Section B-4 of NPDES Permit No. MI 0002381.

- a. The pH shall be within the range of 6.0 to 9.5, 90% of the time; within the range of 6.0 to 10.0, 100% of the time during a 24 hour period beginning on or about 7:00 a.m. of each day. The pH shall be monitored as follows: continuous report the environ and minimum and percent of time within each range during the above 24 hour period.
- b. The discharge shall not cause excessive foam in the receiving waters. The discharge shall be essentially free of floating and settleable solids.
- c. The discharge shall not contain oil or other substances in amounts sufficient to create a visible film or sheen on the receiving waters.
- d. Samples taken in compliance with the monitoring requirements above shall be taken at Outfall 006 prior to discharge to Manguagen Creek.

Intake Monitoring Requirements

During the period beginning on the effective date of this Final Order and lasting until the expiration of authorization under this Final Order, the permittee shall monitor the intake as specified below:

	Maniforing Requirements			
	Reagainer, aid.	Suiple		
Charact ristic	Frequency	Type		
B GD ₅	Weekly	24 Hr. Comp.		
Total Suspended Solids	5x Weckly	24 Hr. Comp.		
Chie ides	3x Weekly	24 Hr. Comp.		
COD	3x Weekly	24 Hr. Comp.		

- Scoples taken in compliance with the monitoring requirements above shall be taken of the intake after initial screening.
- 8. Limitations, Monitoring and Reporting Requirements for Deep Disposal

Beginning upon the issuance of this Final Order and lasting until the expiration of authorization of this Final Order the permittee shell dispose of previously authorized wastewaters into an approved strata by means of disposal wells which shall be equipped, tested, and operated in conformance with the requirements of the Mineral Malls Act, Act 315, Public Acts on 1929 and Act 2.5, Public Acts of 1929, as amended, and the rules promulgated thereunder. The company shall submit to the Chief of the Water Quality Division and obtain his approval of its continguacy plan for periods of outage of the deep well disposal system. Any outage of the deep well disposal system shall be imacdiately reported to the Chief of the Mater Quality Division and the Geological Survey Division Supervisor of Waste Disposal Wells.

Mr. Tristing May of Compartant Dr. of Hall Minneaut

PARAMETER Wellhoad Pressure	(None set)	FREO''ENCY Weekly	TYPE Prig
Flow Rate		Weekly	GTM (Dusp Rate)
Flow Total		Monthly	MG/MON (Last day)
Total Suspended Solids		Weckly	6/1000 gal (Grab)

The disposal to the deep well is limited to currently authorized discharges. Any new discharges to the deep well shall be done in accordance with Part II-A-1 of NADES Permit No. MI 0002381.

The above authorization pertains to the deep well disposal units as permitted by the Geological Survey Division of the Michigan Department of Natural Resources.

Mineral Well Permit No.	Well No.
049-736-882	4-049
048-736-882	6-049
047-736-882	15-047

Reporting Requirements for Deap Well Disposel

The permittee shall comply with the following reporting in accompanies with the schedule under G of MPDES Permit No. M1 0000361, Enhanced by Compliance - Deep Well Disposal.

- a. Submit contingency plans for periods of outage.
- b. Submit a completed Michigan Discharge Permit Application and a "Well and Reservoir Data on Underground Industrial Watts Disposal Systems" form (as approved by the Geological Survey Division of the Department of Natural Resources) for each disposal well to the Chief of the Water Quality Division Department of Natural Resources on or before N/A.

Review of the discharge(s) to the deep disposal well(s) will be under upon receipt of the application. Any modification in the disposal well requirements of the permit will be made in accordance with Part II-T-4 of NPDES Permit No. MI 0007381.

SECTION B POLLUTION INCIDENT PREVENTION PLAN

IT IS FURTHER ORDERED that Pennwalt Corporation implement the approved Pollution Incident Prevention Plan in accordance with the following schedule:

1. West Plant

- a. Secondary Containment (Diked Tanks)
 1.) The Company has submitted and received approval of a final design, typical of the facilities to be constructed.
- b. Spillage Containment (Tank Car and Tank Trailer Building No.
 49 Unlanding/Loading)
- 1.) The Company has submitted and received approval of a final design, typical of the facilities to be constructed.
 - (2.) Complete construction by August 1, 1981.

- Spillage Drainage Prevention (Tank Car and Tank Trailer Loading/Unloading)
 1.) Inc Company has submitted and received approval of a time configuration of the factivities to be constructed.
- 2.) Complete construction by October 1, 1981.
- In-Process Containment Facilities (Sump and Valves)
 Submittal and approval of a final design, typical of the facilities to be constructed, by March 1, 1981.
 - 2.) Complete construction by June 1, 1982.
- e. Vacuum Trailer (b): 21.) A vacuum trailer is on site and operational.
- 2. East Plant
 - a. Secondary Containment (Diked Tanks)
 - 1.) The Company has submitted and received approval of a final design, typical of the facilities to be constructed.
 - Complete construction by August 1, 1981.
 - b. Secondary Spill Prevention (Dry Monts)
 1.) The Company has submitted and received approval of a final design, typical of the facilities to be constructed.
 - Complete construction by November 1, 1981.
 - Alternate Containment Program (Undiked Tanks-Plugs)
 1.) The Company has submitted and received approval of a final design, typical of the facilities to be constructed.
 - (1.7.) Complete construction by October 1, 1931.
 - d. Spillage Containment (Tank Trailer Unloading)

 (1.) The Company has submitted and received approval of final Company typical of the facilities to be constructed.

 (2.) Chaplete construction by September 1, 1981.
 - Shirlage Drainage Prevention (Tank Car and Tank Trailer)
 The Company has submitted and received approval of a final design, typical of the facilities to be constructed.
 - (1.) Complete construction by August 1, 1981.
 - Alternate Containment Program (In-Process)
 Submittal and approval of a final design, typical of Δης αποδεί the facilities to be constructed, by June 1, 1931.
 - 2.) Complete construction by September 1, 1982.
 - g. Liquid Ferric Studge (Defluidizing Pad)
 1.) Submitted and approval of a final design, typical of the facilities to be constructed, by April 1, 1981.
 - (2.) Complete construction by September 1, 1981.

In the latter case, the notice shall include the cause of noncompliance, any remedial actions taken and the projected date for completion of construction.

IT IS FRAMER CADDRED that Pennwalt Corporation submit progress rejects on or before July 1, 1981, January 1, 1982, July 1, 1982, and January 1, 1983 regarding the status of implementation of the Pollution Incident Prevention Plan.

SECTION C PROCESS WASTEWATER CHARACTERIZATION STUDY

1

Penuwalt Corporation shall conduct a Process Mastewater Characterisation Study in accordance with Attachment "A" hereto in accordance with the following:

- Submit an approvable schedule to implement the Wastemater Characterization Study, Attachment "A" to the Chief of the Water Quality Division on or before July 31, 1980. The Company has submitted a schedule which is under review.
- Submit a listing of parameters by process, for which southitical
 procedures are currently not available, to the Chief of the
 Water Quality Division on or before July 31, 1980. The Coppany
 has submitted this listing.
- 3. Submit an approvable detailed analytical procedure for a fix parameter identified in 2, above to the Chief of the Low Quality Division by date of entry of this Final Order, a copt as provided in 4, below. The analytical procedures approved by the Chief of the Water Quality Division shall be untilled in the process wastewater characterization study. The degraph has submitted a proposed analytical procedure for the laser alkylanines through di-n-butylamine which is under review.
- 4. SECTION D - CONCLUSION

IT is Adreed that the entry of this Final Order is in settlement for violations of NPUES Permit No. NI 0002381 and Final Order of Abater at F.O. 1931. The entry of this Final Order completes the Company's obligations under the Final Order on. 1931 and supercedes and rescinds Final Order No. 1931.

The More walt Corporation agrees that but for this Final Order, the Company with the rehiest to the emit possive provisions provided by law for failure of the Company to be in full compliance with the terms and conditions of NFDIS Permit No. MI 2002381 and Final Order of Abatement E. 1931. The Penn Alt Corporation and the Pepartment hereby agree that the \$159,000 liquidated domages paid on October 10, 1977, and the 1.516 and declares payments paid permanut to Final Order No. 1931 totaling \$1.000 and including the \$30,000 accompanying this settlement, the total of the above representing a payment of \$360,000, constitute fair sittlement for the above alleged violations and completely satisfy the Corpory's obligations under Final Order of Abatement No. 1931. This settlement is not a release or waiver of liability for environmental datage or resource impairment that has or may result from past, current or future Corporary operation.

The Company agrees, however, to pay the following liquidated damages for failure to comply with the conditions of this Final Order:

- 1. For those days beyond the date of entry of this Order, until May 31, 1981, any discharges from Outfalls 002, 003, 005, or 006 that are in violation of the final effluent limitations for the respective outfalls specified herein, \$2,000 per day. Any pH excursions of 15 minutes or less duration shall not be subject to this \$2,000 per day payment provision. All exercisions, however, are subject to appropriate enforcement action.
- 2. On June 30, 1921 the Company shall notify the Department of Enternal Renounces in writing for each day since the date of cetry of this Order for which the \$2,000 is payable under this subjection of this Order, and the Company shall contemporaneously pay and amounts (if any) then account to the State.
- 3. A violation of the final effluent limitations for Outfalls 600, 003, 005, or 606 after the date of entry of this Order is a violation of this Final Order. The State may seek other and further relief for noncompliance conducted after any final compliance date specified in this Order.

Paramett Comparation is hereby put on Notice by this Commission that any retorial failure to couply with this Tinal Order may result in prompt enforcement action. A violation of any date in any of the schedules of coupliance specified herein is a violation of the Total Order.

or such other authority as may be appropriate for review of any matters relating to this Final Order.

of the Department of Natural Resources and shall expire July 1, 1992. The authorizations to discharge pursuant to Section A of this Final Order shall expire upon final action by the Mater Resources Countsion on Pennsult Corporation's application dated November 30, 1979 for reissuance of REDES Termit No. MI 0002381. The Commission and the Department retain jurisdiction to mo. Ty this Order or enter such further Orders as the fact and circumstances may warrant.

Robert M. Buckley

THRU: A.R. Winklhofer, Director, EDO

Engineering Section, 5EAE ATTN: Stephanie Valentine

The subject facility was observed during the EDO intensive air survey ("hot spot") in Wayne County, Michigan, June 1-2, 1981, conducted at the request of Air Enforcement (Dave Ullrich's memo of May 5, 1981).

Notification of this activity was provided per 114(d)(1) CAA as amended by Willie H. Harris, EDO during a meeting with Wayne County Air Pollution Control Division staff on May 14, 1981.

As shown on the attached report excessive visible emissions were not observed and the facility was not entered.
